

CS 312 Transposal of Vacant Rental Objects to Real Estate Portals

SYSTEM-SUPPORTED PUBLICATION OF RENTAL OBJECTS WITH DATA AND IMAGES

To reduce periods of vacancy, objects about to become vacant or are already vacant including pictures need to be published automatically on one or more real estate portals as soon as notice of termination is received. At the same time, you need the data for prospective tenants in your SAP system.

The screenshot shows the SAP Rental Unit interface for 'Rental Unit 3300/3000/3'. The 'Publishing Internet' section displays a table of data for publishing:

Det	Publ.	S	Orig.	Document title	S.
	<input checked="" type="checkbox"/>	1	Stair/ground		
	<input checked="" type="checkbox"/>	2	Entrance		
	<input checked="" type="checkbox"/>	3	bathroom		
	<input checked="" type="checkbox"/>	4	kitchen		
	<input type="checkbox"/>		Building		
	<input type="checkbox"/>		Bedrooms		
	<input type="checkbox"/>		living room		

Below the table, there is a 'Description for one picture' section with a 'Publish picture' dropdown set to 'X Publish picture' and a 'Sequence' dropdown set to '3 3. Picture'. A 'Modern bathroom' image is shown. A green arrow points from the SAP interface to a list of real estate portals including Street.ch, London Apartment Rentals, and gottarent.com.

YOUR BENEFITS BY USING THIS ADD-ON

- Rental objects are automatically published upon receipt of termination notice (reduces vacancy periods)
- Rental objects, partner data, and images are hereby transferred electronically to the real estate portals
- The prospective tenant data is inserted automatically and can be processed further
